

Product Information Sheet

Product Range:	Castaway Bulk Produce Films
Product Codes:	VF1300X40, VF1300X45
Description:	Castaway Bulk Produce Films are plasticised PVC food grade stretch/cling films exhibiting high clarity, cold fog dispersal and excellent cling and food preservative characteristics.
Material:	Food grade virgin PVC resin, plasticisers and process aids formulated to provide high levels of strength, clarity and cling.
Safe Handling:	Suitable for wrapping all fruit & produce. For use at temperatures between -60°C & +130°C. Keep away from small children to prevent ingestion.
Storage:	To maintain the film's unique properties, it should not be subjected to prolonged extremes of temperature or direct sunlight and should ideally be stored below 20°C.
Environmental Considerations:	Because the film is contaminated with organic food material at time of disposal it cannot be recycled. Don't use excessive amounts of film for each wrap & dispose to an official landfill.
Food Safety/ Quality Management Certifications:	Only virgin, food safe raw materials are used for manufacture. Product manufacture is independently certified to HACCP 2003 Food Safety & ISO 9001 Quality Standards.
