Our commitment to sustainability

At Castaway®, we have taken a responsible approach to delivering high quality packaging solutions that positively contribute to today and tomorrow's society. We are committed to sourcing the most sustainable products and ensuring environmental sustainability is a fundamental part of our core business philosophy. We are responsible for procuring sustainable, ethical and responsibly sourced materials, goods and services.

Sustainable food packaging.

Towards 2025

We are on a journey towards creating a circular economy where we maximise reuse, recycling and recovery, and minimise the amount of waste going to landfill. We promote sustainable packaging design, increased recycling rates and efforts to reduce packaging litter.

MPM Marketing Services is a signatory of the Australian Packaging Covenant (APCO), a sustainable initiative that encourages businesses to reduce the environmental impact of consumer packaging.

We are proud to be working towards the 2025 National Packaging Targets, an industry-driven collaborative initiative led by APCO to improve material types and help reduce the amount of waste entering the system, specifically:

100% of all Australian's packaging will be reusable, recyclable or compostable by 2025 or earlier

70% of Australia's plastic packaging will be recycled or composted by 2025

50% average recycled content will be included across all packaging by 2025

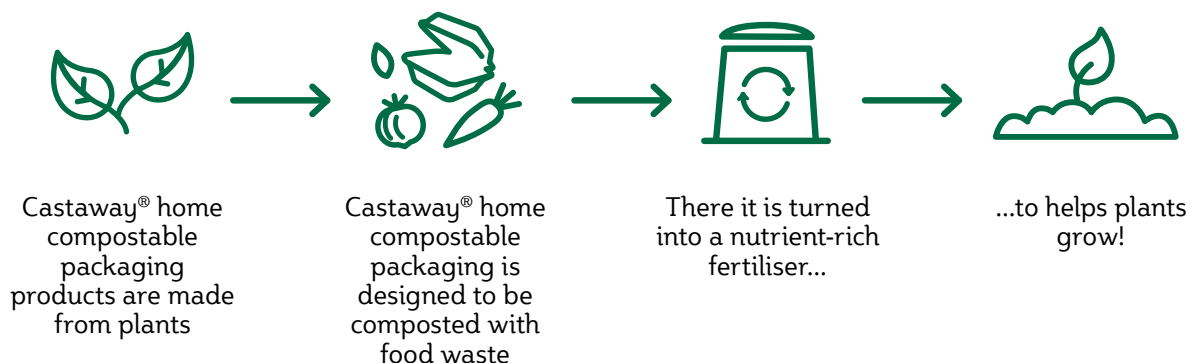

Problematic and unnecessary single-use plastic packaging will be phased out through design, innovation or introduction of alternatives.

We're making progress, and continue to work on a broad set of solutions.

Innovation

Providing an alternative to traditional oil-based packaging and grown by nature, this new range has been designed with circularity in mind – helping reduce waste while creating a nutrient-rich compost, a highly valued commodity in the agricultural industry.

Sugarcane containers.

Enviroboard® food containers are the ideal choice for food service operators looking to reduce their environmental impact. Made from renewable sugarcane, these containers are compostable, while their matching secure, rPET lids offer optimum visibility, and are recyclable – making this range the perfect takeaway solution.

GREAT FOR: Salads, curries, noodles, stir-fries, poke meals and more.

100% Compostable Sugarcane Packaging

Enviroboard® range combines sustainable design with exceptional performance, using pulp that comes from sugar cane fibres (bagasse) – one of the world's most abundant annually renewable resources. Sugar cane bagasse is the dry residue left after sugar cane fibre has been pressed for juice. Being a renewable material it is low impact, and ideal for producing tableware due to its high strength.
