Superior presentation for your food creations

Colpac food packaging offers new and innovative ways to present your food creations. All products are made from sustainably sourced paper with both FSC and PEFC certifications. Additionally, a number of clear lids are now made from recycled post-consumer P.E.T. plastic, reducing the amount of waste sent to landfill.

Stamp or sticker?

Several products in the Colpac range can be custom branded by using an ink stamp, or through the application of a self-adhesive label. These are simple, cost-effective ways to build your brand and stand out from the crowd.

Café Collection

Colpac® food packs have a natural appearance, and feature clear windows to entice customers to try your creations. They are ideal for cafés and convenience stores wanting an easy grab 'n' go solution for their takeaway food menu.
