

PRIMESOURCE® GARBAGE BAGS

Are you disposing of paper in the office, or glass bottles and wet food at your pub or restaurant? Choosing the correct bag is critical to prevent accidental spills and protect the safety of you and your customers. Use the guide below to find the correct PrimeSource® garbage bag for your particular application.

STAR SEAL

Star seal bags have greater vertical strength because the underside of the bag is gathered, folded and sealed at the centre of the base of the bag.

Choose a star seal bag for:

- Preventing leaks - sealed at the centre, the bag is less likely to leak through a seam
- Heavy duty applications - the bag will hold more weight without breaking
- Easy removal - the star seal gives the bag a more rounded shape when full, making it easier to remove from the garbage bin.

FLAT SEAL

A flat seal is where the seal has been applied to run from one side to the other side of the bag. The flat design of the bags mean that they do not fit as well to the shape of most garbage bins.

Choose a flat seal bag for:

- Reducing costs - flat seal bags maximise volume capacity
- Light duty applications - flat seals are not as strong as star seals or gusseted seals.

GUSSET SEAL

A gusset seal bag is similar to a flat seal but with both sides tucked in to make a gusset.

Choose a gusset seal bag for:

- Maximising volume capacity - the extra width provided by the gusset allows more garbage to fit in the bag
- Wheelie bins - the gusset seal gives the bag a more rectangular or square shape, making it a good fit for wheelie bins.

KITCHEN TIDY BAGS ROLL PACKS – PERFORATED

CA-GH04V
18 L, flat seal
Perforated roll, high density
White
450 x 540 mm
50 / sleeve
1000 / carton

CA-GH06V
27 L, flat seal
Perforated roll, high density
White
610 x 510 mm
50 / sleeve
1000 / carton

CA-GH08V
